

Siemens showcases integrated technologies for industry, infrastructure and grids at ELECRAMA 2025

- **Digitalization technologies to address a wide range of customer challenges – decarbonization and resource efficiency**
- **Sustainable solutions for industry and infrastructure – Electrification X, Building X, Gridscale X, Digital Twins, Cybersecurity**

Siemens India strengthened its position as a preferred provider of technology solutions to address customers' digital and sustainability challenges at ELECRAMA 2025, one of the world's largest electrical and allied electronics shows.

On display at ELECRAMA 2025 are a wide range of technology solutions addressing the challenges of customers across industry, infrastructure and grids from Siemens: ranging from Electrification X, Building X, Industrial Operations X and Gridscale X, low voltage switchgear, advanced power distribution panels, industrial 5G and cybersecurity.

Matthias Rebellius, Member of the Managing Board of Siemens AG and CEO Siemens Smart Infrastructure said, *"India is a powerhouse with one of the biggest growth potentials in the world. As a leading tech company, Siemens' portfolio and history in the country puts it in the perfect position to support the digital and sustainability transformation of India's energy, building and industry infrastructure by combining our innovative technologies and a local network of factories, partners and centers of competence."*

Sunil Mathur, Managing Director and Chief Executive Officer, Siemens Limited, added, *"Global trends are coming into India faster than in other parts of the world, and the only way that the nation's electrical and manufacturing industry can remain competitive is through technology. Digital technologies, integrated with artificial intelligence, provide the transparency of data required for faster decisions, efficient operations, improved quality and productivity. Siemens is uniquely positioned to address customer challenges through deep expertise across market segments with its strong technology portfolio. At Siemens, we view decarbonization and resource*

efficiency as a holistic approach to reducing CO2 emissions through technological innovation, digitalization, and collaborative efforts across various sectors. Through the technologies showcased at ELECRAMA 2025, we can support our partners and customers in India with the tools they need to drive productivity, flexibility and quality in their operations while decarbonizing their infrastructure and operations.”
